PREFACE

Conduct of the War is one of ten parts of a series of selected and annotated bibliographies to be known collectively as "Bibliographies of a World at War." The aim is to provide a guide to current materials published since April 1941, relating to national defense and the war effort. It is planned to issue the various parts noted below as separates and later bound as a unit. Supplements will appear at certain regular intervals.

- I. Political Developments and the War
- II. Agriculture in a War Economy
- III. Natural Resources and Raw Materials
- IV. Industry in Wartime
- V. Labor in Wartime
- VI. Economics of War
- VII. Civilian Defense
- VIII. Social and Cultural Problems in Wartime
- IX. Conduct of the War
- X. Postwar Planning and Reconstruction

CONDUCT OF THE WAR

BIBLIOGRAPHIC NOTE

This bibliography on the Conduct of the War possesses significance as a list of contemporary references on the conduct of World War II in the eight months of United States cooperation with the Allies immediately before Pearl Harbor and the four months of United States active participation immediately after Pearl Harbor. The period covered is April 1941 through March 1942.

No outstanding bibliographies are available in the Library of Congress dealing exclusively with the conduct of the war in these months, but certain yearbooks and other items of a more or less bibliographical nature are listed in the first section of Part One of this bibliography, and various references on the subject are included among items in the Bibliographic notes of the nine other bibliographies of this World at War series.

The most important sources of information on the conduct of the war are government and private publications devoted to the interests of members of the armed forces of the United States and other countries. Among the former may be mentioned the U.S. NAVAL INSTITUTE PROCEEDINGS (U.S. Naval Institute, Annapolis), the MILITARY REVIEW (U.S. War Dept., Command and General Staff School, Fort Leavenworth), the CHEMICAL WARFARE BULLETIN (U.S. War Dept., Chemical Warfare Service, Washington), and the ARMY MEDICAL BULLETIN (U.S. War Dept., Medical Field Service, Washington).

There are numerous private periodicals devoted to the interests of special divisions of the armed forces. Among them may be mentioned the ARMY AND NAVY JOURNAL, ARMY AND NAVY REGISTER, ARMY ORDNANCE, CAVALRY JOURNAL, COAST ARTILLERY JOURNAL, INFANTRY JOURNAL, MARINE CORPS GAZETTE, MILITARY ENGINEER, MILITARY SURGEON, QUARTERMASTER REVIEW and the UNITED STATES NAVY MAGAZINE, all having editorial offices in Washington. Among similar foreign periodicals are the MILITÄRWOCHENSCHAU (Berlin), NAVY (London), REVISTA DE MARINA (Callao, Peru), ROYAL AIR FORCE QUARTERLY (London) and TANK (London).

The items in this bibliography are classified along the lines of the conduct of the war during the period of the United States participation rather than during the so-called Defense period. The classification of Part Three, Various Theatres of the War, follows in general the classification employed by the U.S. Dept of State, grouping countries according to their proximity to the oceans of the world, but combines all the warring Far East countries bordering on the Pacific and the Pacific islands involved in the war in one large class, the Pacific Front.

This bibliography concerns itself with the actual conduct of the war by armed forces of the nations involved. Items dealing with medical aspects of the war and technical aspects of the training of the armed forces are not included.

The items are arranged alphabetically by title within the divisions of the classification, without cross references. An Author index and Geographical index are attached.
